

INSTALLATION INSTRUCTIONS

Thank you for choosing Ambassador Marine.

Your new Ambassador Marine faucet, shower, sprayer or accessory will give you years of trouble-free performance. Please read these instructions carefully before installing your new item. If you have any additional questions about the installation of this product, feel free to contact a customer service representative at 1.800.270.4262.

IF REPLACING AN EXISTING FAUCET:

Turn off the water supply to your existing faucet (this procedure will vary depending on the specific plumbing system installed on your boat). Remove your existing faucet, taking care not to damage your existing water lines. Clean bulkhead (wall) or deck area in preparation for new faucet.

IF ADDING NEW HOLE TO BULKHEAD/DECK:

See "Installation Hole Requirement" to the right, for this model. Check to ensure there is enough room for the unit, including necessary supply line(s), pull-out hose, etc. behind the bulkhead (wall) or under the deck. Drill hole, using proper bit for the surface material and diameter.

Installation Hole Requirement

This unit requires a minimum of this/these hole(s)

INSTALLING YOUR NEW AMBASSADOR MARINE UNIT:

NEEDED / HELPFUL TOOLS

1) Check desired position to make sure there is ample room for the transom shower with shut-off valve/mixer, supply hoses and pull-out hose to gather under the deck or inside the wall without getting kinked or caught on anything. Our optional Mesh Bag may help ensure easy use of the hose.

2) Based on desired transom shower installation direction (opening down, opening up, etc.) (see options in Step 3), adjust the shut-off valve/mixer so that the handle is positioned straight down and centered between the hot and cold side-to-side rotation, when in the off position. If needed, slightly loosen the shut-off valve/mixer's mounting nut on the back of the transom cup, reposition and re-tighten mounting nut.

3) From the front side of the bulkhead (or above the deck), place the transom shower with shut-off valve/mixer through the hole.

Wall Mount— Place into the hole with the hinge pointing in the desired direction, either OPENING UP, DOWN or TO THE RIGHT. Do not position opening to the left, to avoid pull-out hose interfering with the shut-off valve/mixer. DOWN is the preferred direction as it will allow the lid to fall out of the way of the hose when in use. Please note: The sprayer's trigger will stick out through the back hole when the sprayer is resting in the transom cup. It is important to ensure there is ample clearance for the trigger, in order to prevent accidental discharge. Secure transom cup and lid using the provided four (4) screws.

Deck Mount— Place into the hole with the hinge pointing in the desired direction for the lid to easily lay open when in use. Please note: The sprayer's trigger will stick out through one of the side holes when the sprayer is resting in the transom cup. It is important to ensure there is ample clearance for the trigger, in order to prevent accidental discharge. Secure transom cup and lid using the provided four (4) screws.

4) Verify the Connector Hose(s) are screwed in securely to the Valve Body. Connect water supply lines (not provided) to the Connector Hoses (hot- red, cold- blue). Supply lines will vary depending on the specific plumbing system installed on your boat. To properly connect to the hoses, supply line must be the North American 'STANDARD 1/2" FAUCET' (1/2" NPS*) connector with a washer in the female connector. Wrap threaded fittings with plumber's (Teflon) tape. Follow the appropriate steps depending on your water supply line. If you have a per-assembled water supply hose with threaded swivel-nut connector, simply screw on supply hose. We do NOT suggest using sweat fittings as they are prone to blow-outs.

5) Attach pull-out hose to the sprayer, ensuring the flat 1/2" rubber washer is in the hose conical before connecting.

6) Slide hose with sprayer through the "down" hole in the transom cup, as illustrated. Attach pull-out hose to the third connector hose (silver/gray), ensuring the flat 1/2" rubber washer in the hose fittings before connecting.

7) After installation is complete, turn the water supply back on and allow both hot and cold water to run for at least one full minute. While water is running, check all connections for leaks. Connections may need re-tightening.

8) This sprayer has two functions: intermittent and continuous. For intermittent spray, simply press down on the trigger. For continuous spray, lift up on the trigger until it locks. To release, simply press the trigger back down.

Parts

Design: Rev. A

- 1) Small Sprayer (with hook)
- 2) 6' Stainless Steel Hose Assembly
 - 2a) Washer
 - 2b) 6' Stainless Steel Hose
 - 2c) Washer
- 3) Transom Shower Cup & Lid Set (all plastic)
 - 3a) Mounting Screws
 - 3b) Transom Lid (plastic)
 - 3c) Transom Dual Cup

- 4) Aidack- Mini Shower Mixer / Shut-Off Valve (H/C)
 - 4a) Aidack- Handle Assembly
 - 4a-1) Aidack- Handle Canopy
 - 4a-2) Set Screw
 - 4a-3) Aidack- Handle Tip
 - 4b) Cap
 - 4c) Retainer Nut
 - 4d) Ceramic Disc Cartridge
 - 4e) Escutcheon
 - 4f) O-Ring
 - 4g) Valve Body
 - 4h) Rubber Washer
 - 4i) Metal Washer
 - 4j) Mounting Nut
 - 4k) Connector Hoses

COLOR/FINISH SUFFIX CODES

* Supply Connection(s) - Understanding NPS vs. NPT

NPS = National Pipe Straight

NPT = National Pipe Tapered

(-M = Male -F = Female)

Straight Threads (Male)

Tapered Threads (Male)

Plumbing fittings are commonly referred to as "NPT", however, in reality, nearly all FAUCETS are actually "NPS". NPS is the North American "STANDARD" for faucets, regardless of brand, style, application, etc. Outside North America, BSP is the most commonly used standard.

Both NPS and NPT have the same thread angle, shape, and pitch (threads per inch). However, NPS threads are straight (parallel) and NPT threads are tapered (reduced).

Straight Pipe thread is commonly found on faucets, showerheads, hose connections and fittings. Tapered Pipe thread is commonly found on pipe ends, nipples and fittings (i.e. couplings, elbows, tees, etc.). Straight Pipe threads need a gasket or o-ring to create a seal. Both styles require sealant or plumber's tape for optimal seal. While NPS and NPT threads will engage, they do not seal properly with each other.

PROPER FINISH CARE

Your new faucet or accessory is protected by a marine grade finish. To clean it, you only need to wipe it with a damp, soft cloth. NEVER use any abrasive cleaners, steel wool, or chemicals (including alcohol or ammonia), as they will harm the finish and void your warranty. If the item will be installed in a salt-air environment (boat exterior), regular cleaning with gentle soap and carnauba wax will prolong the life of the finish.

LIMITED WARRANTY

Ambassador Marine faucets and accessories are guaranteed to be free from material and workmanship defects under normal use and service for a period of five (5) years from the date of purchase. This warranty will not apply to faucets or accessories that were improperly installed, misapplied, or incompatible with components not manufactured by Ambassador. Faucet failures due to foreign debris is not covered under the terms of this limited warranty. Ambassador will not warrant any faucet or accessory that is physically damaged, or altered outside the Ambassador factory.

Returns are to be shipped postage prepaid to Ambassador Marine's service center at: Ambassador Marine, 1173 Calle Suerte, Camarillo, CA 93012. A Return Authorization Number is required and must be clearly visible on the shipping carton.

Absolutely no credit or payment will be allowed for consumers on any item deemed defective. Ambassador Marine's obligation is limited to the repair or replacement of the defective item only, at Ambassador Marine's sole discretion. All returns will be examined and/or tested under Ambassador Marine test criteria. Replacements will be shipped freight prepaid.

This limited warranty is in lieu of all other warranties, expressed or implied, and no other person is authorized to give any other warranty or assume obligation or liability on Ambassador Marine's behalf. Ambassador Marine shall not be liable for any labor, damages, or other expenses, nor shall Ambassador Marine be liable for any indirect, incidental or consequential damages of any kind incurred by the use or sale of any defective product.

This limited warranty covers Marine Products sold or distributed in the United States and Canada only. Customers who purchase Ambassador Marine products sold by distributors in other countries must consult their local distributors for their warranty policy. **This warranty is only a representation of the complete Ambassador Marine warranty outlined on the Ambassador Marine website and/or catalog.**
